## Non-woven Combi Flap Brush Wheel

### Surface Restoration Made Easy

There is nothing better than a polish and buff to bring out the natural shine and lustre of a surface. Conventional abrasive wheels may be too rough and might damage the surface. Our Non-Woven Combi Flap Brush Wheel is ideal for this task. The combination of soft Non-Woven abrasive and interlayer of sand paper works by buffing, polishing, as well as sanding down the surface to achieve the perfect finish.

Our Non-Woven Combi Flap Brush Wheels are made with tightly packed nylon core ring interleaved with abrasive buffing surface. Our Non-Woven Combi Flap Brush Wheel are available in a choice of 4 abrasive surfaces: Coarse (CRS), Medium (Med), Fine (Fin) and Very Fine (VFN)

#### Recommended Usage & Application

Similar to our Non-Woven Flap Brush Wheel, the interleaved abrasive wheel pad is perfect for surface restoration, scratch removal, blending and brushed finishing stainless steel. As a general rule of thumb, use coarser abrasive grades for deeper regaining and very fine abrasive grades for satin finishing.

Stock Code	Description	Grade	Mos
SKCB-150000	SK Non-Woven Combi Flap Brush Wheel 150 x(25mm-1400mm)x 25.4mm	CRS/MED/FINE/VFN	3,000RPM
